

KING SEAL FASTENER TECHNOLOGY QUALITY CLAMPS

Company profile

King Seal Fastener Technology (Anhui) Co., Ltd. was established in 2005 by an American clamp maker that required high quality product and on time shipments, coupled with the lower costs available by having manufacturing operations in China. We are an American owned business, and we operate with the best combination of American and Chinese business practices.

Production equipment and tooling in use at King Seal was designed in North America, and our products meet or exceed both North America and Europe standards.

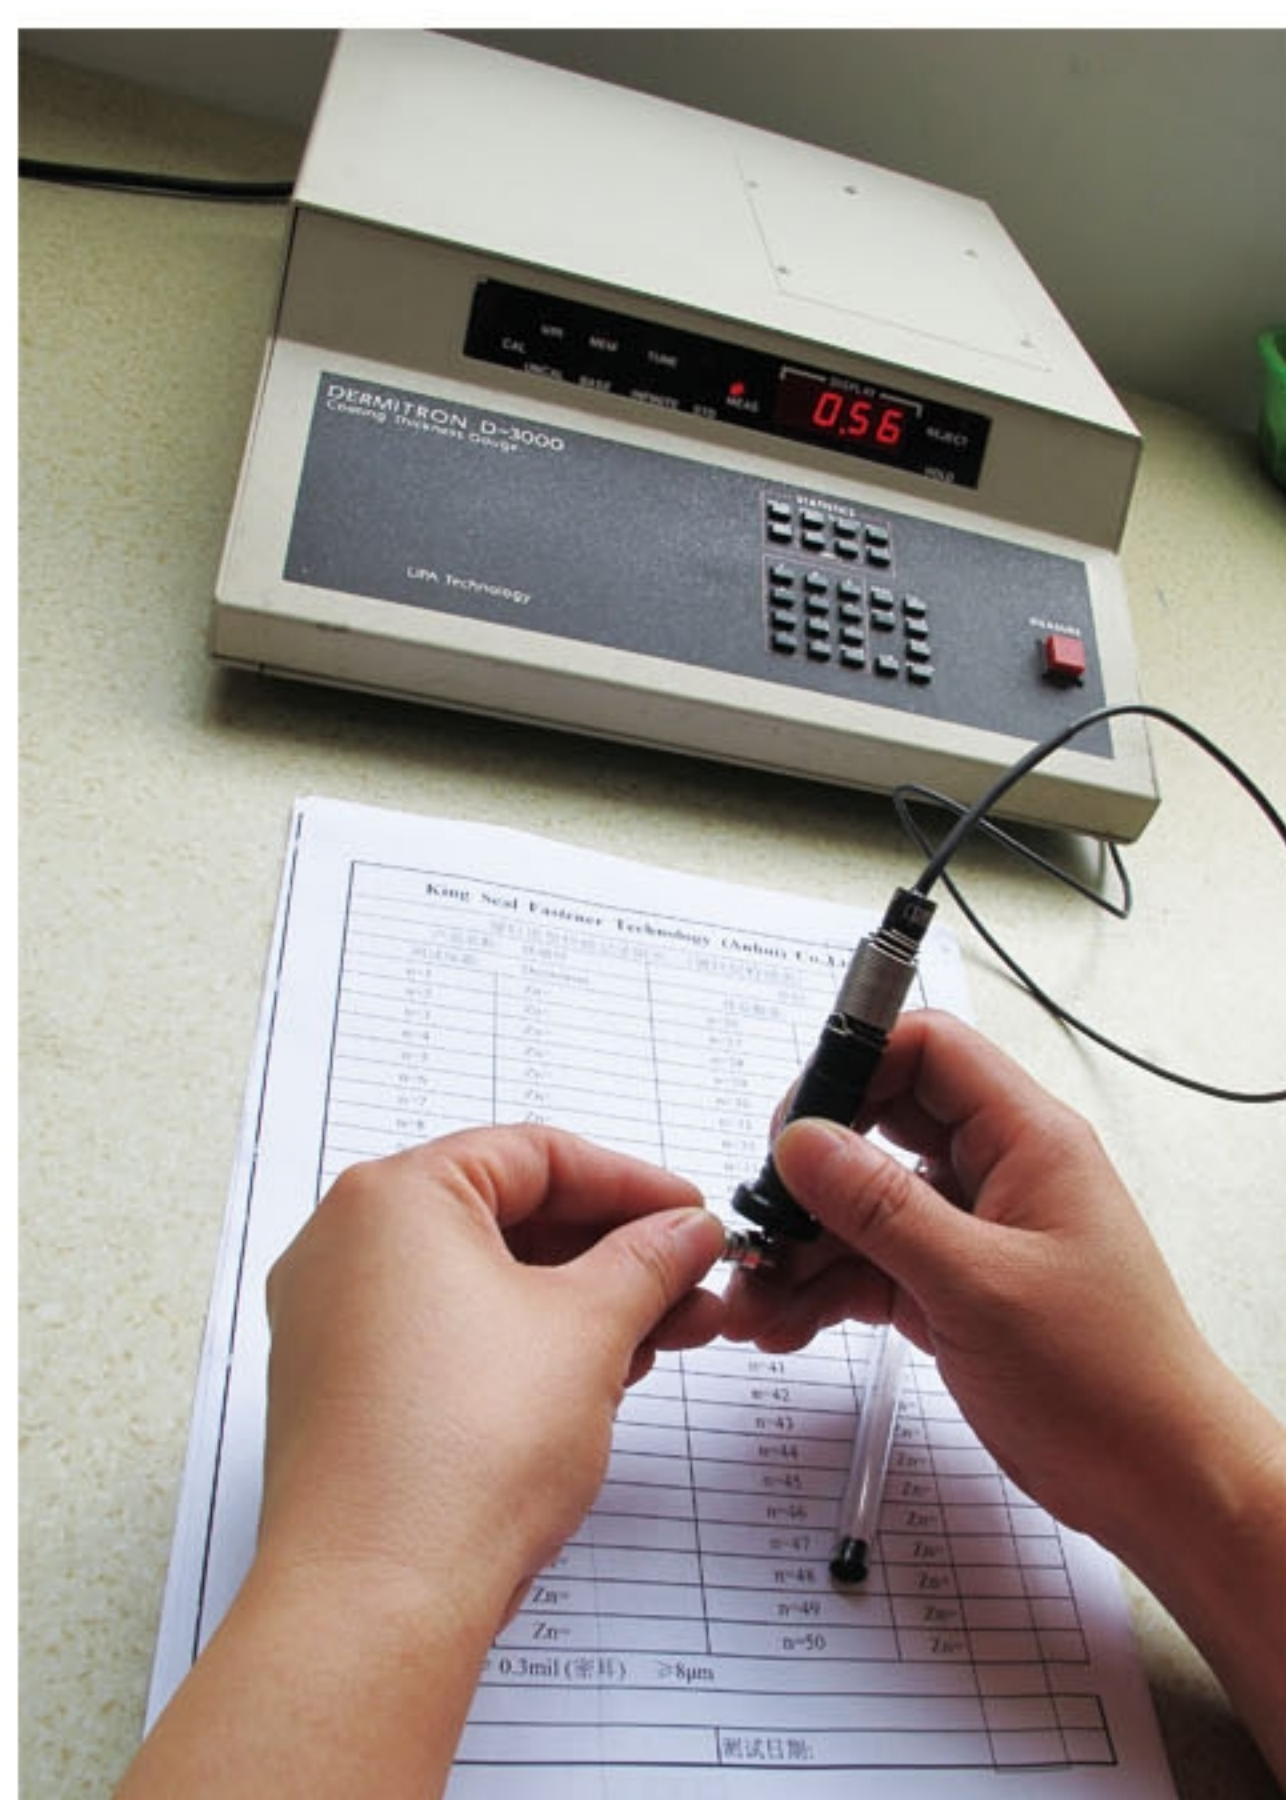

King Seal designs and manufactures fasteners and clamps for use in many applications, including those in the agriculture, automotive, truck, off-highway, municipal, marine, irrigation, beverage, and plumbing markets.

Our global commitment to customer service outdistances our competition and is reinforced through our ISO 9001:2008, ROHS & TUV certification.

Our products are mainly exported to North America, Europe, Australia and Japan. We hope to grow with high-end users all over the world.

Thanks for your interest on King Seal. We look forward to be your partner.

We have true process control.
